PROFILE

I am a Bachelor of Science in Information Technology graduate, a highly motivated person with a passion for continuous growth. I have two years of programming experience and continue to expand my knowledge about the rapidly evolving world of technology. During my college studies, I worked as a capstone programmer within our group. Additionally, I acquired valuable experience as a Laravel API developer during my internship. Furthermore, my last position as a junior web developer provided me with an opportunity to deepen my understanding of the corporate work environment and gain further practical insights. My goal is to become a programmer, apply my programming knowledge to enhance my skills, and contribute to a company's success. I am currently seeking full-time employment opportunities and ready to start working.

WORK EXPERIENCE

Chanz IT Solutions | Junior Web Developer | August – November 2023
