PROFILE

I am a Bachelor of Science in Information Technology graduate, a highly motivated person with a passion for continuous growth. I have two years of programming experience and continue to expand my knowledge about the rapidly evolving world of web technology. During my college studies, I worked as a capstone programmer within our group, and I also gained valuable experience as a Laravel API developer during my internship. I am currently learning Vue JS and Laravel to become a full-stack developer and improve my web development skills by creating projects using these frameworks. My goal is to become a web developer, apply my programming knowledge to enhance my skills, and contribute to a company's success. I am currently seeking full-time employment opportunities and ready to start working.

WORK EXPERIENCE

Neksjob Corporation | Web Developer Intern | February – April 2023

- Built a Laravel REST API project
- Collaborated with a team
- Used postman to test API endpoints
- Used bitbucket as our web-based version control repository hosting service
- Created token management to generate from client side
- Used JWT for Token Expiration
- Fixed some UI from company website
- Created one feature from scratch from their website to enable employers monitor their applicants
- Used technologies: Laravel, Blade Templates, Bootstrap, Restful APIs, MySQL, Postman, Git, Bitbucket

---
